Profile

I am an aspiring website developer and designer, graduating in Digital Media at the University of Portsmouth in July 2018. I have a passion for web and mobile app development and have a keen interest in developing my skills as deeply as possible during my initial career steps. Over the last three years at University, I have vastly improved my skillset and personality, where I have gained key attributes such as project management and team work.

Interests

In my spare time, I am focussing on working on my social media accounts and keeping up with the latest trends in technology. This also helps with my work as I can keep on top of the digital media and marketing industry. Besides working, I like to spend time watching sports and going to music concerts where I enjoy my social life.
